

Module 1 Quiz

1. Which OOP principle hides the internal implementation details of an object?

- A) Inheritance
- B) Encapsulation
- C) Polymorphism
- D) Abstraction

Answer: D) Abstraction

2. Which component of JDK is used to compile a Java source file?

- A) JVM
- B) JRE
- C) javac
- D) java

Answer: C) javac

3. Which of the following is not a primitive data type in Java?

- A) int
- B) float
- C) String
- D) char

Answer: C) String

4. Which is the correct declaration of an array in Java?

- A) `int arr[5];`
- B) `int arr = new int[5];`
- C) `int[] arr = new int[5];`
- D) `array int arr = 5;`

Answer: C) `int[] arr = new int[5];`

5. Which operator is used to find the remainder of a division?

- A) /
- B) %
- C) //
- D) &

Answer: B) %

6. What is the output of the following code?

```
int x = 10;  
System.out.println(x++);
```

- A) 9
- B) 10
- C) 11
- D) Error

Answer: B) 10

7. Which statement is mainly used to execute a block of code based on a condition?

- A) if
- B) break
- C) continue
- D) return

Answer: A) if

8. Which loop is guaranteed to execute at least once?

- A) for
- B) while
- C) do-while
- D) Enhanced for

Answer: C) do-while

9. Which keyword is used to create an object in Java?

- A) class
- B) new
- C) object
- D) create

Answer: B) new

10. Which of the following is a constructor?

- A) void Student()
- B) Student()
- C) constructor Student()
- D) new Student()

Answer: B) Student ()

11. What is the main purpose of a constructor?

- A) To destroy an object
- B) To initialize an object
- C) To inherit a class
- D) To override a method

Answer: B) To initialize an object

12. Which statement about constructors is correct?

- A) Constructor must have a return type
- B) Constructor name must be different from the class name
- C) Constructor name must be the same as the class name
- D) Constructors cannot have parameters

Answer: C) Constructor name must be the same as the class name

13. Which keyword is used to inherit a class in Java?

- A) inherits
- B) implements
- C) extends
- D) super

Answer: C) extends

14. What is method overriding?

- A) Defining two methods with the same name in the same class
- B) Redefining a superclass method in a subclass
- C) Creating a constructor
- D) Creating a static method

Answer: B) Redefining a superclass method in a subclass

15. Which annotation is commonly used to indicate that a method overrides a superclass method?

- A) `@Override`
- B) `@Overload`
- C) `@Method`
- D) `@Inherited`

Answer: A) @Override

16. Which access specifier provides the widest access?

- A) `private`
- B) `protected`
- C) `public`
- D) `default`

Answer: C) public

17. Which access specifier restricts access to the same class?

- A) `public`
- B) `protected`
- C) `private`
- D) `default`

Answer: C) private

18. Which keyword is used to declare a static member?

- A) `static`
- B) `final`
- C) `constant`
- D) `shared`

Answer: A) `static`

19. A static variable belongs to:

- A) Each individual object
- B) The class
- C) The constructor
- D) The method only

Answer: B) The class

20. Which OOP concept allows a subclass to reuse the properties and methods of a superclass?

- A) Encapsulation
- B) Abstraction
- C) Inheritance
- D) Polymorphism

Answer: C) Inheritance
