

Module 2 Quiz

1. Which keyword is used to declare a package in Java?

- A) `import`
- B) `package`
- C) `class`
- D) `include`

Answer: B) `package`

2. Which statement is used to access a class from another package?

- A) `package`
- B) `access`
- C) `import`
- D) `include`

Answer: C) `import`

3. Which package is automatically imported into every Java program?

- A) `java.util`
- B) `java.io`
- C) `java.lang`
- D) `java.net`

Answer: C) `java.lang`

4. Which keyword is used to implement an interface?

- A) `extends`
- B) `inherits`
- C) `implements`
- D) `interface`

Answer: C) `implements`

5. Which keyword is used to declare an interface?

- A) class
- B) interface
- C) implements
- D) abstract

Answer: B) interface

6. A class can implement:

- A) Only one interface
- B) Only two interfaces
- C) Multiple interfaces
- D) No interfaces

Answer: C) Multiple interfaces

7. Which block is used to handle an exception?

- A) try
- B) catch
- C) finally
- D) All of the above

Answer: D) All of the above

8. Which keyword is used to explicitly throw an exception?

- A) throws
- B) throw
- C) catch
- D) final

Answer: B) throw

9. Which keyword declares that a method may throw an exception?

- A) throw
- B) throws
- C) try
- D) catch

Answer: B) throws

10. Which exception occurs when an integer is divided by zero?

- A) `NullPointerException`
- B) `IOException`
- C) `ArithmeticException`
- D) `ArrayIndexOutOfBoundsException`

Answer: C) `ArithmeticException`

11. Which block is generally executed whether an exception occurs or not?

- A) `try`
- B) `catch`
- C) `throw`
- D) `finally`

Answer: D) `finally`

12. A thread in Java can be created by:

- A) Extending the `Thread` class
- B) Implementing the `Runnable` interface
- C) Both A and B
- D) Creating a package

Answer: C) Both A and B

13. Which method starts the execution of a thread?

- A) `run()`
- B) `start()`
- C) `execute()`
- D) `begin()`

Answer: B) `start()`

14. Which method contains the code executed by a thread?

- A) `start()`
- B) `stop()`
- C) `run()`
- D) `sleep()`

Answer: C) `run()`

15. Which method is used to pause a thread temporarily?

- A) `wait()`
- B) `pause()`
- C) `sleep()`
- D) `stop()`

Answer: C) `sleep()`

16. What is an enumeration (`enum`) in Java?

- A) A type used to define a fixed set of constants
- B) A type of exception
- C) A package
- D) A thread

Answer: A) A type used to define a fixed set of constants

17. Which is the correct syntax to declare an enumeration?

- A) `enum Day { MON, TUE, WED }`
- B) `enumeration Day { MON, TUE }`
- C) `Enum Day { MON, TUE }`
- D) `enum = Day { MON, TUE }`

Answer: A) `enum Day { MON, TUE, WED }`

18. What is autoboxing in Java?

- A) Converting a primitive value into its wrapper object
- B) Converting a `String` into an integer
- C) Converting an object into a primitive
- D) Creating a package automatically

Answer: A) Converting a primitive value into its wrapper object

19. Which of the following is an example of autoboxing?

- A) `int a = new Integer(10);`
- B) `Integer a = 10;`
- C) `String s = 10;`
- D) `double d = "10";`

Answer: B) `Integer a = 10;`

20. What is unboxing in Java?

- A) Converting a primitive into an object
- B) Converting an object into a package
- C) Converting a wrapper object into a primitive value
- D) Converting an interface into a class

Answer: C) Converting a wrapper object into a primitive value
